## SUMMARY

---

With a strong foundation in web design, frontend, and backend development, I bring extensive experience in crafting innovative web prototypes. Holding a Bachelor's degree in Information Systems from Nusa Mandiri University, I have refined my skills to develop cutting-edge websites that consistently meet and exceed client expectations. Based in Bekasi, I leverage my technical proficiency in HTML5, CSS, Bootstrap, JavaScript, PHP Native, and several programming languages including PHP, JavaScript, Java, Dart, and Node.js to create seamless and engaging user experiences.

Passionate about technology and its potential to drive business transformation, I am committed to advancing the industry through creative and user-centric solutions. My approach blends technical expertise with a strong design sensibility, ensuring that every project not only functions flawlessly but also captivates its audience. By staying abreast of industry trends and continuously honing my skills, I aim to deliver exceptional outcomes that foster success and innovation for my clients and stakeholders.
